

DAY-DREAMER®

Portal To Oz!

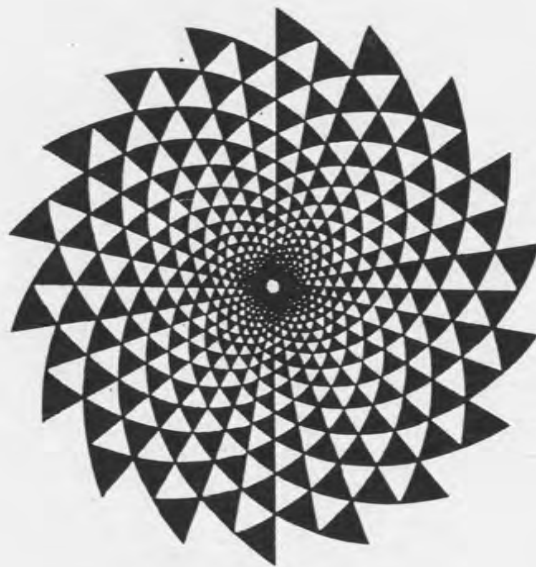

WARNING: KEEP EYES CLOSED WHEN FACING SUN. OPENING EYES MAY CAUSE EYE DAMAGE.

DIRECTIONS

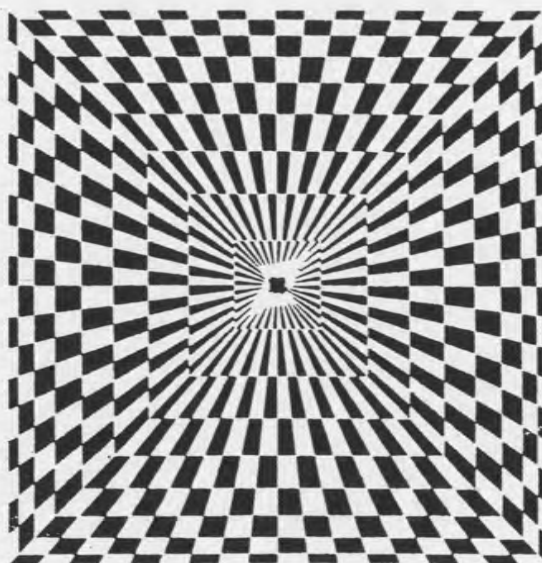

ON A SUNNY DAY:

1. Be in a sitting/reclining position.
2. CLOSE YOUR EYES.
3. Facing the direction of the sun, **blow** air into the tube using long deep breaths. (Do not hyperventilate.)
4. Find the right speed to get the optimum effects. (About 8 to 12 cycles per second.)
5. With DAY-DREAMER in place, very SLOWLY turn your head 10-20% to the left and right of the sun. (This will produce maximum colors, and pattern changes.)
6. Keep your EYES CLOSED.
7. Sit back and enjoy your colorful inner daydream.

P.S. Music makes an enjoyable addition to the DAY-DREAMER experience.

These are some samples of the many different 3-D patterns you may visualize in full color spectrum while using the DAY-DREAMER!

DAY-DREAMER®

Portal To Oz!

EXPERIENCE A COLORFUL 3-D WORLD OF GEOMETRIC SHAPES & PATTERNS WITH YOUR EYES CLOSED!

A COLORFUL QUANTUM LEAP INTO YOUR IMAGINATION!

The **DAY-DREAMER** is a mind-expanding visualization toy (tool) which is used while your **EYES ARE CLOSED** producing **DREAM-LIKE STATES**. Used while lying in the sun, by the pool, the beach or your own back yard, you simply blow into a tube, causing the inner disk to rotate. This rotation regulates the flickering effect of the sun's full color spectrum upon and across your **CLOSED EYELIDS** producing the most amazing 3-D visual display of colors, patterns and shapes you may ever wish to experience.

Please read this brochure completely.

Follow the directions and heed the warnings before using your **DAY DREAMER!**

Suggested age: 17 years and over.

As you play with the DAY-DREAMER you may find that different colors and patterns appear with each experience. Rapid change in colors and patterns have been attributed to many things, such as the time of day or your current emotional and/or mental state of mind.

WHAT IS HAPPENING?

*Is this only another toy to play with?
Or a spiritual device?
Does it have any therapeutic effects?
Or is it just a kaleidoscope of the mind?*

Each person must answer these questions in his or her own way. Here are a few thoughts to enhance your enjoyment and benefit of the DAY-DREAMER experience.

Physically, the human brain is noted for its large area devoted to vision. The flickering effect of the sun's full color spectrum upon and across your closed eyelids produced by the DAY-DREAMER causes a reaction in which "phosphenes" are produced within the closed eyes, stimulating the visual part of the brain. This enables you to experience inner vision.

The DAY-DREAMER is truly a natural experience. As children we all remember playing in our own imaginary worlds, squeezing our eyes to produce colors, daydreaming and pretending in play. As we reach adolescence, society pressures us to leave this imaginary world behind. The DAY-DREAMER offers the ability to bring back this capacity for seeing the world with a child's eye.

According to certain Yogic philosophy the human chakras and/or full color spectrum consists of red, orange, yellow, green, blue, indigo, and violet. These colors, when blended

together, produce pure white light, the same light which is generated by our local star, the SUN. The DAY-DREAMER takes this light, spinning it into colorful mandalas and spiraling prismatic vortexes for your visual delight!

Could the DAY-DREAMER be used for meditation? Perhaps. Fixing your gaze on colors and patterns while the eyes are closed and the use of a deep breathing method is common in tantric techniques that are aimed toward awakening the mind's eye.

The DAY-DREAMER is a new development reminiscent of many ancient philosophies. For many, it is a consciousness toy of Enlightenment. So enjoy your DAY-DREAMER as it allows for the exploration of your psychic sandbox, setting you free to create three-dimensional shapes, patterns and colors limited only by your imagination!

We at Alpha Odysseys would like to thank you for purchasing the DAY-DREAMER. Please express your visual experiences and share your toy with others.

Pick one up for a Friend!

The DAY-DREAMER is truly the affordable, portable mind machine of this new millennium. It makes the perfect gift to delight the seeker in all of us!
